PROFILE SUMMARY

Full-Stack Software Engineer with 2 years of experience building dynamic front-end applications with Angular and robust backend APIs using ASP.NET Core. Skilled in scalable system design, secure database integration (MSSQL, MySQL), and delivering cloud-native solutions with Docker, Kubernetes, and Azure. Passionate about developing end-to-end applications, including biometric and digital verification systems.

TECHNICAL SKILLS

Frontend Development : Angular, HTML, CSS, Bootstrap, Blazor
Backend Development : ASP.NET Core MVC, Web API, OOP, Design Patterns
Database Management : SQL Server, MariaDB Server, MySQL
Containerization and DevOps : Docker Container, Kubernetes, Azure DevOps, Jenkins
Infrastructure Management : Terraform
Cloud

EDUCATION

2019 – 2023

Shree Venkateswara Hi-Tech Engineering College, Gobi

Anna University, Chennai

Bachelor of Engineering, Computer Science and Engineering

CGPA: 8.3

WORK EXPERIENCE

2023– Present

Software Engineer L4 ,ClaySys Technologies, Kochi

- API Development for Nextly Liveness Project (MVVM)
 - Designed and developed RESTful APIs for a Face Liveness detection system using .NET Core.
 - A platform used to authenticate biometric data securely, ensuring identity verification through facial recognition and liveness detection.
 - Integrated MSSQL databases for efficient data storage, retrieval, and management.
 - Worked closely with AI/ML teams to integrate facial recognition models into the system.
- Nextly Sign (MVC Project)
 - Developed and maintained a digital signing application using ASP.NET Core MVC.
 - Designed and optimized backend services for document management and signing workflows
 - Nextly ESign is a secure and efficient digital signing platform for electronic document authentication.
 - Integrated MySQL as the backend database for secure and efficient data storage.
 - The project is deployed in a Docker container on Linux, ensuring scalability and portability.

• Resort Booking Application (Angular)

Resort Booking Application — Developed a full-featured web application using Angular to streamline resort operations, including user booking management, room allocation, guest management, and room inventory handling. Implemented an intuitive UI for seamless booking flow, ensuring efficient reservation tracking and improved user experience..

Tech Stack: .NET Core, ASP.NET Core MVC, MySQL, RESTful APIs, Angular
